EXPERIENCE

Limbic Technologies

Frontend Developer

Bhopal, India

Jan 2025 – Present

- Implemented a Shopify-like subscription storefront enabling 1,000+ premium users to manage plans and place inventory orders across multiple outlets.
- Engineered an order and inventory management platform used by 30+ outlets with real-time order tracking, outlet selection, and configurable order limits.
- Built a role-based admin panel managing access permissions for 50+ staff across inventory, orders, and outlet operations (Admin, Outlet Managers, Staff).
- Improved frontend performance and SEO achieving 90+ Lighthouse scores through lazy loading, memoization, and code splitting.
- Integrated CyberSource payment gateway with secure card processing, fallback handling, and real-time transaction status notifications.
- Developed a UK client career portal supporting 5,000+ users with AI-assisted job search, authentication flows, and automated reminder systems.

Tech Stack: React.js, Redux, Context API, JavaScript (ES6+), HTML5, CSS3, TailwindCSS, Material UI, ShadCN UI, REST APIs, CyberSource Payments, Lighthouse, Git

Limbic Technologies

Frontend Developer Intern

Bhopal, India

Aug 2024 – Jan 2025

- Built 3+ React dashboards using Material UI to manage and visualize 50,000+ product records with advanced search, filtering, and server-side pagination.
- Integrated 10+ REST APIs to efficiently fetch and render large product datasets in client-facing dashboards.
- Improved page load performance by 30% using memoization, lazy loading, and code splitting.
- Developed 20+ responsive HTML/CSS email templates for automated product notifications and client communications.

Tech Stack: React.js, Tailwind CSS, HTML5, CSS3, Material UI, ShadCN UI, REST APIs, Python, Git, Github

PROJECTS

Abroad Education

March 2025 - May 2025

- Developed a responsive consulting websites for international college admissions featuring **50+ videos, 70+ testimonials, 10+ blogs, and service information.**
- Engineered dynamic content sections and 10+ reusable UI components to manage blogs, testimonial reels, and marketing pages.
- Implemented an admin panel to manage blog posts, testimonials, and site content updates.
- Integrated contact workflows allowing prospective students to submit admission inquiries directly through the platform.
- Platform supports **100+ visitors** and **10+ daily user visits** accessing blogs, testimonials, and admission resources.

INSIGHTSPHERE

Dec 2023 - Feb 2024

- Developed a full-stack blogging platform enabling users to sign up, 100+ publish blogs efficiently, like, and comment on posts with real-time engagement features.
- Implemented a rich text editor with 2 image upload in one time support using Multer for seamless media embedding within blog content.
- Built an analytics dashboard to track post engagement metrics including 100's of likes, comments, and user interactions.
- Designed and integrated **15+ REST API endpoints** and developed **20+ reusable React UI** components for scalable content management.
- Improved frontend responsiveness by applying lazy loading and optimized component rendering for content-heavy pages.
